The Faculty of Medicine has recently received approval from the UBC Senate to deliver a new Graduate Certificate in Primary Health Care. We are hoping to engage an instructor for week 2 of the first course.

The purpose of the 18-month certificate is to help participants to gain the skills to work confidently on interprofessional primary care teams.

First course – Foundations in Primary Health Care – has a start date of January 2021.

This course introduces learners to the key concepts and benefits and potential pitfalls of team-based primary health care and forms the foundation of the graduate certificate. Participants will be introduced to fundamental concepts in primary health care including policy, leadership, team-work and the dynamics of team-based care, the impact of environment on team functioning, and more. These concepts will be developed and explored in increasingly more detail in the sequence of courses that follow.

We are seeking to engage an instructor for the second week of the course, the topic of which is: The Big Picture. What we anticipate covering in the week is shown below, although this is open to discussion.

- Framework for Health Care – primary, tertiary, acute, rehab. LTC
  - Overlap and Unique Parts of Framework
  - Policy PHC in BC, Canada, WHO
  - Delivery Models
- Primary Healthcare – including teamwork integration

It is anticipated that instructor involvement in their week module will consist of:
- Develop Learning objectives
- A short (3 – 5 minute) video to introduce the focus of your week, it’s importance and the learning process and activities for the module.
- A one-hour interactive video seminar delivered online live (with recording for participants who cannot attend) OR a series of 5 – 7 minute videos covering the material you want to include in your week, with accompanying short segments of text to bridge the video segments.
- Developing stimulating discussion questions and engaging with learners through the week on your discussion question/s
- Short wrap video summary.

If you are interested, we would be delighted to hear from you. Please contact:
